

# Website Audit & Maintenance - Muhammad Nadir

## Website Audit & Maintenance Services

At Muhammad Nadir, we specialize in ensuring your website performs flawlessly, remains secure, and delivers a smooth user experience. Our Website Audit & Maintenance service helps identify technical issues, improve performance, and maintain long-term stability for your business.

### ■ Website Audit Includes:

- Technical SEO and site performance analysis
- Page speed optimization review
- Mobile responsiveness and usability testing
- Security vulnerabilities and SSL inspection
- Broken links, redirects, and 404 error checks
- Content quality and keyword structure audit

### ■ Website Maintenance Includes:

- Regular content and plugin updates
- Server and hosting performance monitoring
- Backup management and disaster recovery setup
- Bug fixing and issue resolution
- Design & layout improvements (on request)
- Security patches and malware scanning

### ■ Tools & Technologies:

WordPress, React.js, Node.js, Google Lighthouse, SEMrush, GTmetrix, and other modern web tools.

### ■ Our Workflow:

1. Initial consultation and website review
2. Comprehensive audit report generation
3. Implementation of fixes and optimizations
4. Ongoing maintenance and monthly reporting

### ■ Why Choose Muhammad Nadir:

- Transparent reporting and progress updates
- Dedicated support and fast turnaround
- Experience with eCommerce and business websites
- Affordable plans tailored for startups and enterprises
